

Axial piston double pumps

- max pressure 350 bar
- displacement 2x50; 2x75; 2x105 cm³

Axial piston pumps with fixed displacement

- max pressure 420 bar
- displacement 35; 50; 75; 105 cm³

Axial piston pumps with fixed displacement

- max pressure 320 bar
- displacement 25....75 cm³

Axial piston pumps with variable displacement

- max pressure 420 bar
- displacement 50; 75; 105 cm³

Axial piston pumps BPV

- max pressure 420 bar
- displacement 35; 50; 70; 100 cm³

Gear pumps high pressure

- nominal pressure 200 bar
- displacement 0,26....266,66 cm³

Gear pumps low pressure

- nominal pressure 20 bar
- displacement 6,66....66,66 cm³

Gear pumps for combines

- pressure up to 300 bar
- displacement 4,2 do 66,66 cm³

Gear pumps for tractors

- pressure up to 300 bar
- displacement 4,2 do 66,66 cm³

Gear pumps high pressure (like BOSCH)

- nominal pressure 250 bar
- displacement 4 do 22,5 cm³

Hand pumps - piston pumps for general and special application
- pressure 60....1500 bar
- capacity for one cycle 1....50 cm³

Hand pumps - piston pumps for vehicle cab tilting
- pressure up to 350 bar

Radial piston pumps
- nominal pressure 320 bar
- displacement 1,2....30,8 cm³
